-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/07/2004 has been entered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 50 is rejected under 35 U.S.C. 103(a) as being unpatentable over Campbell (GB 303,593, previously cited) and Hubbard et al.

Campbell discloses the claimed device except it is unclear if the opposing lateral edges comprise heat seals. Hubbard et al. discloses that it is known in the art to form analogous bladders from two flat sheets heat sealed together along their outer peripheral edges. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the hot water bottles of Campbell by heat sealing two flat sheets together along their outer peripheral edges, as in Hubbard et al.,

in order to provide a hot water bottle that is leak-proof/leak-resistant along its edges. Furthermore, applicant has not disclosed that heat-sealing along lateral edges of a bag solves any stated problem or is for any particular purpose and it appears that the Campbell invention would perform equally well with heat seals along its edges.

Furthermore, the edges extending from the left and right side of the funnel-like portion in Campbell comprise a substantially S-shape to the same degree as claimed.

Response to Arguments

4. Applicant's argument with respect to claim 50 has been considered but is moot in view of the new ground(s) of rejection.
